Horizont

- er en af verdens førende producenter og distributører inden for trafikikkerhed.

Sortimentet beror på en bred vifte af produkter til sikkerhed i vejtrafikken.

Udover at beskytte vejarbejdere har man specialiseret sig i specialtilpasset sikkerhedsudstyr til politi, brandbekæmpere og tekniske tjenester. Produkterne er specielt velegnede til sikring af færdselsarbejdere, politi eller brandfolk mod flydende trafik, når de arbejder i risikozoner, men de advarer også bilister i faresituationer fremad, eller giver oplysninger om byggepladser, ulykker, smalle veje eller lignende.

Produktsortiment består bl.a. på:

Adaptore og holdere / Advance Directional Trailers / Advance High-Intensity-advarselslamper / Advance Advarsel Variabel Meddelelse Sign / Arrowboards / Barricades / Barrierer / Baser / Batterier / Bollards / Kabelrampere / Skifterbar Meddelelse Signalhængere / Channelizer / Opladere / Sammenklappelig delineator / Sammenklappelige markører / Kegler / Delinatorlamper / Delinatorer / Udstyr til blokering af veje, mærkning mv. / Udvidelige barrierer / Fastgørelsesskruer / Blinkende beacons / Fleksible markører / Sammenfoldelige markører / Guide Curb / Klapp-Bake / Light Arrows / Manhole barriers / Marker lamper / markører til skinner og hegn / Mini Delineator / Mini-Leitboy / Mobile Warning Trailers / Mobile Lane Sættevogne / Plastposter / Poler / Bærbare elektroniske xenon flashlamper / Bærbare Skiftbare Meddelelseskilt / Bærbar Separator / Portable Traffic Lights / Reboundable Delineators / Genopladelige batterier / Reversible delineators / Road hazard lamps / Rotating beacons / Sekventielle lygtesystemer / Signallamper / Signallamper / Hastighedsbegrænsere / TMA / Køretøjsikkerhedssystemer / Køretøjsmonterede skiver / VMS / LED-variable VMS / LED-variable beskedskilt / Vertikale paneler / VMS / VMS-Trailer / Advarselslamper, etc..

På de efterfølgende sider illustreres et par eksempler på mobile trafikreguleringer.

Multi-Signal - telescopic pole or twin pole

„Multi-Signal“ portable traffic light system by horizon klemmfix is designed to operate either as radio-linked, cable-linked or cable-free (quartz) system. The use of radar – detectors (optional accessory) enables the system to work traffic actuated. Up to 8 signal heads can easily be grouped in order to work as 2 phase-, junction- or crossroads systems. Programming of the Multi-Signal system is done via an easy to handle micro terminal, equipped with 4 touch keys and LCD – screen. Only a few parameters need to be set, as the most common programmes for 2 phase, junctions and crossroads are already pre-set.

The integrated calculation programme automatically determines the best suitable values for your application, according to RILSA (German guidelines for traffic light systems).

Of course those values can also be adapted manually according to your requirements.

- Radio linked/ Cable-linked / Cable-less (Quartz)
- Up to 8 signal heads
- Traffic-actuated operation via radar sensors
- Standard applications pre-set (e.g. 2 phase-, junction- or crossroad), individual programming possible
- Internal memory for up to 10 programmes
- Day time- and week time programming
- Two different types of hot galvanized battery carts available
- Country's frequency on request
- Manual operation by hand set (accessory)
- Wireless radio remote hand set (accessory)
- Plug-on sunshades
- European Standard DIN EN 12368
- European Standard DIN EN 12675
- RILSA (German guidelines for traffic light systems)
- VDE 0832 (German electric safety standard)

Operation modes:

Quartz: automatic, permanent red, amber flashing, lamps off, manual operation
Cable/Radio: automatic, permanent red, amber flashing, lamps off, manual operation, traffic actuated
 Protection against conflicting green (radio and cable systems)
 Feedback (cable/radio)
 Red bulb monitoring
 Automatic light dimming
 Protection of batteries from total discharge
 Transmitting power 100 mW

Terminal:

Illuminated LC-Display
 Automatic calculation of red/green times by setting distance and km/h only
 Four foil covered buttons, splash water protected
 Protection class IP 65
 Internal battery for programme storage (approx. 5 years)

Settings:

	min.	max.
m	5	1999
km/h	5	80
sec., red	3	999
sec., green	1	999
amber	0	9
red/amber	0	15
traffic gap (to be set separately for each signal head)	1	15

Distance:

Cable 2000 m
 Radio 1000 m (depending on ambient conditions) (Multi-Signal)

Operating hours:

Halogen version: with a fully charged battery 12 V/180 Ah, approx. 7 days.
 LED version: with a fully charged battery 12 V/180 Ah, approx. 14 days.

**Alt i beklædning, fodtøj, rengøringsartikler og sikkerhedsudstyr,
 samt reklamegaver og strøartikler med tryk, broderi og gravering, efter opgave.**
 Skilte, bannere og bilreklamer efter tilbud.

Multi-Signal with telescopic pole

Part No.	Description	PQ	
264222 (Halogen)	Multi-Signal Radio / CABLE / QUARZ consisting of:		
	2 x 26422C	Signal head incl. controller and telescopic pole	1
	1 x 26313	Terminal	
	2 x 25742	Radar detector	
	2 x 26204	Battery cart (for 1 battery)	
Multi-Signal Radio / CABLE / QUARZ consisting of:			
264202LED2 (LED)	2 x 26422C-LED Signal head incl. controller and telescopic pole		1
	1 x 26313	Terminal	
	2 x 25742	Radar detector	
	2 x 26204	Battery cart (for 1 battery)	

Specifications are subject to change without notice

Battery replacement WITHOUT INTERRUPTION OF THE RUNNING PROGRAMME by using a SPECIAL PLUG CONNECTOR (optional accessory)

approx. 700 mm

(Part No. 82243 => plug connector)

Part No.	Description	
	Euro-Signal Quarz system <i>consisting of:</i>	
265002 (Halogen)	26502C 2 x Signal head incl. controller (Art.-Nr. 26502); and telescopic pole	1
	26203 1 x Terminal	
	26204 2 x Battery cart	
	Euro-Signal Quarz-LED <i>consisting of:</i>	
265002-LED (LED)	26502C-LED 2 x Signal head incl. controller (Art.-Nr. 26502); and telescopic pole	1
	26203 1 x Terminal	
	26204 2 x Battery cart	
Both, LED and Halogen systems are compatible with one another.		

In compliance with: EN 12368, RILSA, TL-LSA

Portable Traffic Lights - Euro-Signal

horizont Euro-Signal Quartz is designed as a 2 - phase system, combining easiest programming defaults and comprehensive features in one system. Each programme can easily be loaded and stored, overwritten and even amended while it is running.

The system is continuously surveyed by the integrated safety electronics - any amendment required is automatically executed by the systems. Any failure will be shown in the LC-display of the terminal, e.g. under voltage or lamp failure. In this case, the system will automatically start to show flashing amber.

Using the operation mode "Lamps OFF" allows running the system in a stand-by mode, showing no light signal while the internal programme remains running.

By this means battery capacity is saved and operation time can be extended.

Especially user-friendly: even when replacing the rechargeable battery, the programme previously set will be maintained for up to 20 hours.

- Designed for two-phase control
- Main control unit safely mounted in the housing of the green light - theft and vandal proof !!
- Operating hours:
Halogen version: with a fully charged battery 12 V/180 Ah, approx. 7 days.
LED version: with a fully charged battery 12 V/180 Ah, approx. 14 days.

- Terminal with illuminated LC -display
- 2 different sizes of metal battery carts available
- Lamps are protected from short-circuit
- Synchronization surveillance by two separate time circuits
- Synchronisation via high - precision quartz-timers
